- CUP BOARD -

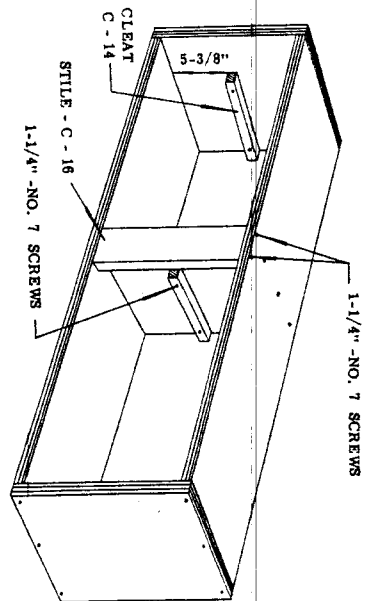

You will note that included in this kit is a Packing List covering all the parts and the fastenings. We suggest that immediately upon receiving this kit you check all the items with the Packing List. If the material is not fully checked at the time of receipt, some items may be mislaid which will cause you some inconvenience.

1. SKETCH NO. 1 details the first step of the assembly. Secure the end pieces (C-10) to the top and bottom pieces (C-9) with screws as indicated and keep all edges flush. Next install the partition (C-15) directly in the center with the back edge flush with the top and bottom.
2. Item (C-14) has been furnished in one piece, therefore cut into four equal parts to make shelf cleats. Secure in position as indicated on SKETCH NO. 2. Now install stile (C-16) by centering over partition and use screws as detailed.
3. Next secure the two shelves (C-13) as shown in SKETCH NO. 3 and keep the back edges flush.
4. The wall cleats (C-11) have been furnished in two pieces and should be cut and fastened as diagramed. When cupboard is completed screws can be inserted through these into the wall studs.
5. The hinges as furnished are of the non-mortising type, secure the female section to the interior face of the doors (C-12). The outward edges of the doors can be slightly rounded if desired. Then install knobs and catches as required.

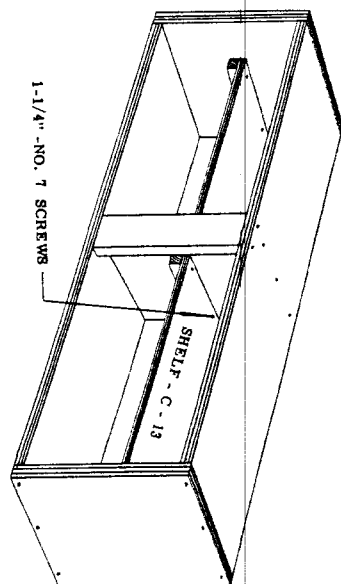

After finishing the assembly give the entire unit a complete sanding job and apply a paint or varnish finish to suit your requirements.
